

GP90

GP 90 is a potent proximity reader which reads up to 90 cm. It is perfect for a wide range of applications, for example control access systems, parkings or applications when read through wall is needed. The main feature is that this reader comes with different interfaces: wiegand, magnetic stripe, RS-232 serial ASCII and RS-485 output, making it so easy to integrate in existing installations.

Features:

- Long distance read
- Relay control
- Encapsulated for outdoor applications
- Most standar interfaces
- Weather resistant

Technical specifications:

Voltage:	6.5 - 15V. (+/- 0.25A to 12V)
Interface:	Wiegand, Magstripe ABA TK2, serial ASCII RS-232, RS-485
Frequency:	125 KHz
Format:	64 bits, Manchester code
Transponder:	read only
Id code:	10 Hex. digits
Audio / visual signal:	led and beeper
Dimensions:	420 x 320 x 28 mm
Operation:	-10° to 60°
